

ONE SOLUTION FOR EVERY INDUSTRY

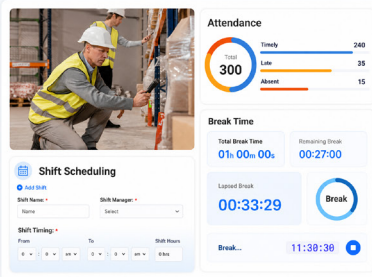

Desk

Time tracking, screenshots, projects, payroll

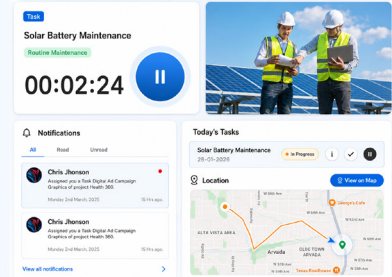

Floor

Attendance machines, shifts, wages, payroll

Field

Mobile app, GPS tracking, geofence, tasks

Proven Globally. Available Worldwide.

See the work. Support the people. Improve the outcome.

A connected workforce productivity platform for teams working behind a desk, across the field, and on the operational floor.

www.staffviz.com

Proven in the United States. Now in Middle East and South Asia.

A global workforce technology journey that began in 2022.

The StaffViz product journey began in 2022 with a clear objective: to give organizations practical visibility into time, work, people, and performance. The platform was built and refined through years of serving businesses in the **United States**, followed by expansion into the **KSA** and **UAE** markets. StaffViz now brings this international experience to **Pakistan**.

With sustained adoption, measurable customer outcomes, and more than 1,250 clients across the United States, StaffViz has established itself among the leading workforce productivity platforms serving American businesses.

PRODUCT JOURNEY

2022

The StaffViz product journey begins, focused on workforce visibility, time tracking, accountability, and business productivity.

United States

Years of market experience supporting remote, hybrid, in-office, and service-based teams across the US.

UAE & KSA

Expansion into Gulf markets, supporting distributed teams, field operations, and growing enterprises.

Pakistan

Global product experience introduced local desks, field, and floor operations across multiple industries.

A viable solution for every industry

From office-based professionals to mobile field teams and shift-based frontline operations, StaffViz adapts its tracking, task, attendance, training, and analytics capabilities to the way each industry works.

Global product experience across multiple work environments

One Platform for Every Way Work Gets Done

StaffViz brings workforce visibility, execution, learning, attendance, and payroll workflows into one operating view.

Every organization works differently. Some teams deliver from laptops. Others move between customer sites, routes, and remote locations. Many operate through shifts, stores, service locations, warehouses, clinics, factories, and other on-site environments.

StaffViz connects these work realities without forcing businesses into a one-size-fits-one-industry model. It helps managers understand where time is spent, how work progresses, whether teams are available, and where operational attention is needed.

One connected source of workforce intelligence across locations and work styles

Desk. Field. Floor.

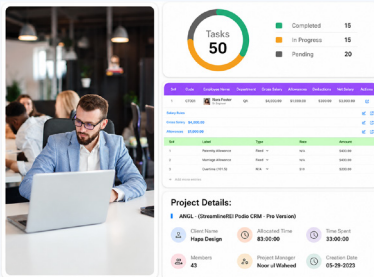

One workforce platform across three operating environments.

DESK

Remote, hybrid & in-office

Time tracking, screenshots, projects, payroll

For remote, hybrid, & in-office teams managing projects, clients, billable time, digital activity, and performance.

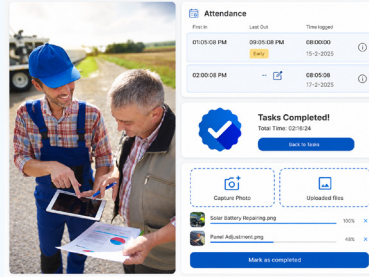

- Time + activity tracking
- Projects, tasks & clients
- Billable work visibility
- Dashboards & training

FIELD

Mobile & distributed

Mobile app, GPS tracking, geofence, tasks

For mobile and distributed teams requiring live location visibility, smart attendance, task updates, and real-time reporting

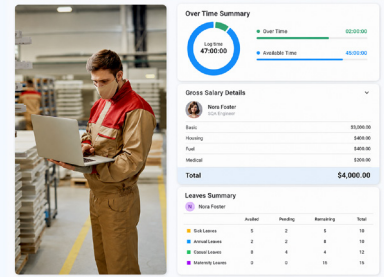

- Live GPS + geo-fencing
- Mobile attendance
- Task proof images
- Alerts + live reporting

FLOOR

Shift-based & on-site

Attendance machines, shifts, wages, payroll

For shift-based & on-site teams attendance management, breaks, and workforce performance.

- Shift management
- Attendance + overtime
- Payroll
- Supervisor visibility

The result is one source of workforce intelligence across locations, roles, schedules and work styles - without separating productivity from daily operations.

Three operating environments. One source of truth.

What Makes StaffViz Stand Out

StaffViz brings workforce management, project execution, field visibility, frontline coordination, and productivity analysis together so managers can act on a complete view of work.

Unified Work Structure

- One platform for desk, field & floor teams
- Time tracking connected with projects, tasks, clients, attendance, shifts, training & payroll workflows
- Live dashboards and advanced reports for faster operational decisions
- Hierarchy-based visibility across organisation, department & employment levels

User-Level Customizations

- Flexible roles and permissions for different teams, managers, sites & business structure
- Digital activity monitoring with appropriate desk-based use cases
- Location-aware visibility, geofencing & mobile attendance for field operations
- No-code / highly configurable operational controls

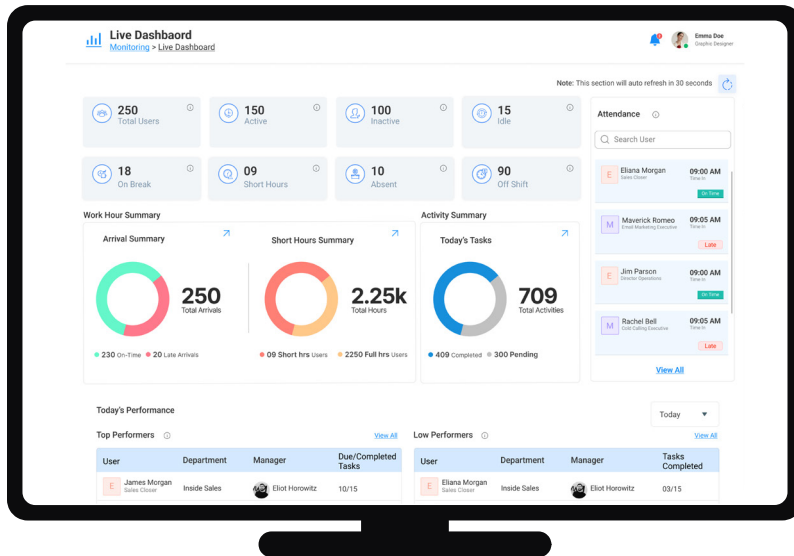

Enhanced Operational Visibility

- Shift, break, attendance, task & learning coordination for frontline and floor teams
- Desktop, web & mobile access across work environments
- Cloud and proven on-premises deployment options for different enterprise requirements
- Complete view of workforce management, project execution, field visibility, & productivity analysis in a single conversation

Complete workforce visibility - not disconnected tools

StaffViz for Desk Teams

Clear visibility for remote, hybrid, and in-office work.

Desk work needs more than attendance records.

They need clarity across projects, deadlines, client work, digital activity, team capacity, and performance trends.

37h
Tracked time

07
Active tasks

- Automatic and manual time tracking
- Online and offline tracking
- Screenshots and activity-level monitoring
- Website and application usage insights
- Productive and non-productive time analysis
- Project and task assignment, prioritization, and progress tracking
- Billable and non-billable project visibility
- Client management and accurate work-hour reporting
- User, manager, team, and project dashboards
- Employee onboarding, courses, articles, quizzes, and training progress

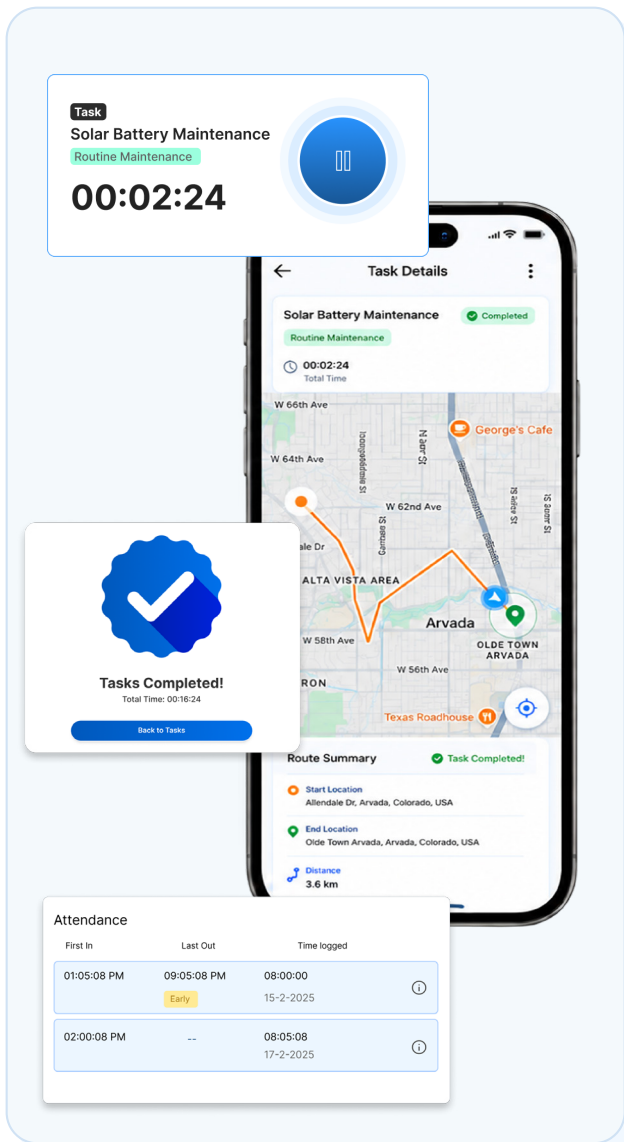

Ideal for

IT & software, professional services, accounting and finance, law firms, marketing & advertising, staffing and recruitment, startups, agencies, and distributed teams.

Built for project work, digital execution, and performance visibility

StaffViz for Field Teams

Make mobile teams visible, accountable, and connected in real time.

Know where work is happening, who checked in, what is complete, and where exceptions need attention.

- Live GPS and location tracking for field operations
- Mobile-based check-ins and time logging
- Selfie verification, geo-location, and geo-fencing support
- Before-and-after task images for work verification
- Work-site definition and location-based visibility
- Task assignment, status updates, and smart workflows
- Real-time alerts and live operational dashboards
- Attendance, late arrival, leave, and performance reporting
- iOS and Android access for teams on the move
- Web dashboards for managers coordinating multiple locations

Ideal for

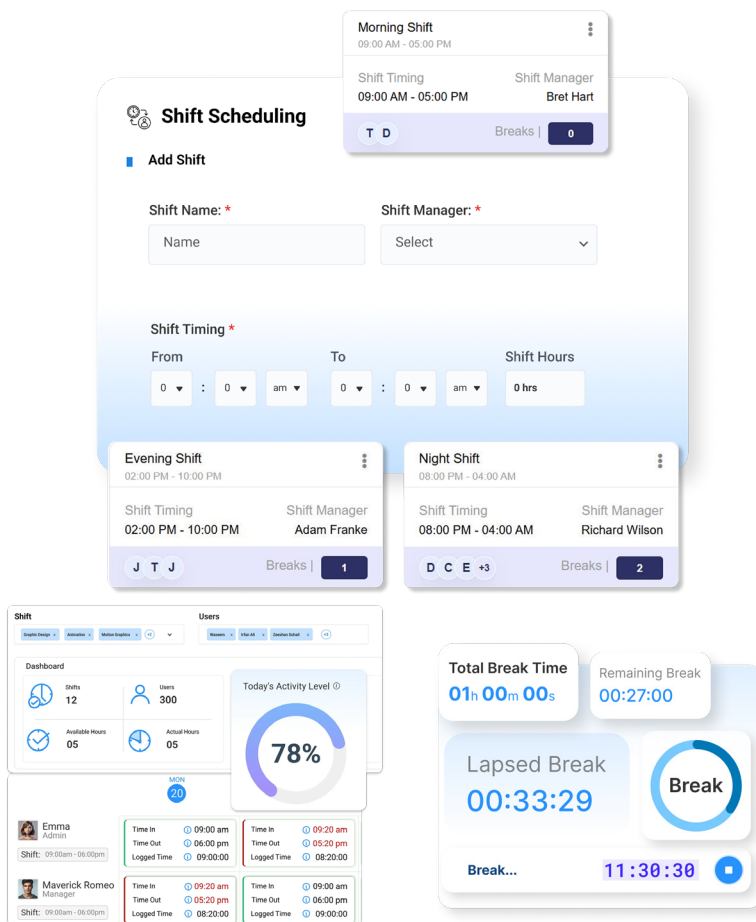

Construction, real estate, logistics, agriculture, field services, maintenance teams, nonprofit and NGO field operations, healthcare outreach, & distributed service teams.

Real-time field accountability with smart attendance and location awareness

StaffViz for Floor Teams

Coordinate shifts, attendance, tasks, and training across on-site operations.

Maverick Romeo Manager	Shift: 09:00am - 05:00pm	09:20 am	05:20 pm	08:20:00

- Multiple shift scheduling & assignment
- Break scheduling and real-time availability visibility
- Attendance, absences, overtime, and downtime monitoring
- Shift changes, swaps, and approval workflows
- Real-time alerts and workforce status visibility
- Payroll-ready time, attendance, overtime, and deduction records
- Role-based access for supervisors, managers, and employees
- Reports that reveal staffing patterns and operational bottlenecks

Ideal for

Manufacturing, wholesale, warehouses, healthcare facilities, retail, hospitality, education, and other shift-based.

Operational coordination for shift-based and multi-location teams

One Connected Workforce Platform

HR Management

Employee profiles, onboarding, employment records, departments, roles, and permissions.

Attendance Tracking

Real-time attendance & shift tracking, work hours, breaks, employee status, and attendance insights.

Payroll Management

Configure salary rules, allowances, bonuses, deductions, salary sheets, and payslip workflows.

Shifts & Breaks Scheduling

Schedule shifts and breaks, manage changes, and monitor attendance and availability.

Time Tracking

Task-based work hour tracking, break time, manual timesheets, & productivity insights across projects.

Project & Task Management

Plan work, assign responsibilities, track progress, and connect time with deliverables.

Employee Training

Create and assign courses, publish articles, conduct quizzes & assessments, & learning progress.

Productivity Reports

Dashboards, project & team reports, productivity trends, time insights, & actionable workforce analytics.

Activity Monitoring

Monitor employee activity, active & idle time, web and app usage, shift activity, and task performance.

Mobile App Tracking

Track time, tasks, attendance & shifts, manage timesheets and assignments, and monitor work from anywhere.

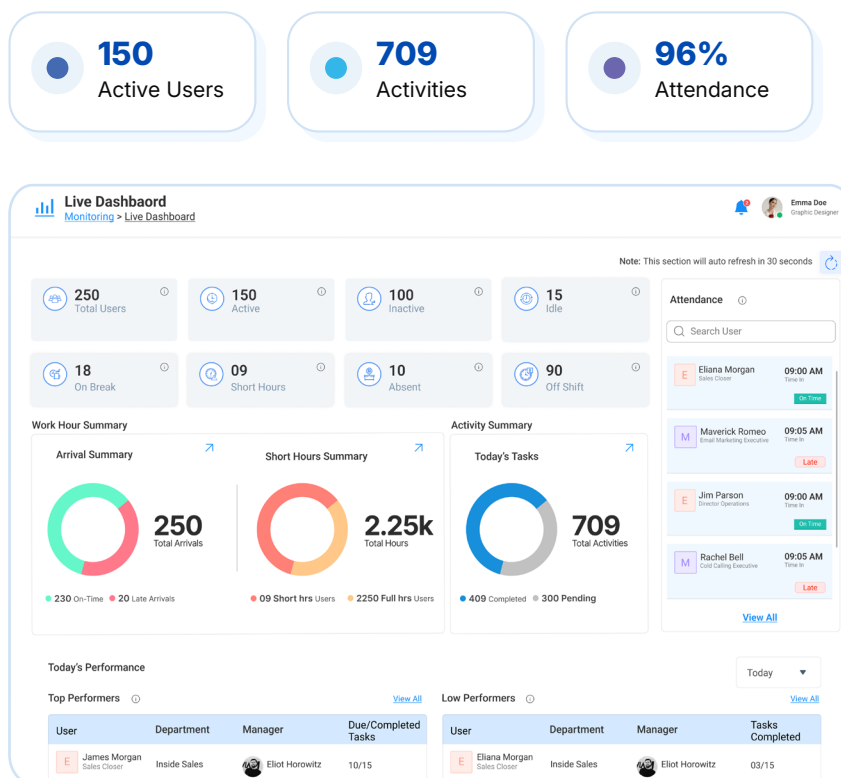

Configurable modules built around the way different teams work

From Time Data to Workforce Intelligence

Turn everyday work signals into decisions managers can use.

StaffViz captures and organizes workforce information across time, attendance, activity, tasks, projects, shifts, locations, and employee development. Managers can then view performance through live dashboards and detailed reports.

Live Dashboard

- Today, weekly, & monthly activity views
- User, team, project, client, & manager reporting
- Active, idle, overtime, short-time, and non-productive time trends
- Attendance, late arrival, leave, and shift insights
- Project hours and billable versus non-billable analysis
- Workload, utilization, and resource-allocation visibility
- Training progress and completion reporting
- Customizable reports for operational, HR, payroll, and leadership needs

A clearer management view

Instead of asking teams for updates across multiple systems, decision-makers can use one connected platform to identify bottlenecks, workload imbalances, missed time, and performance opportunities.

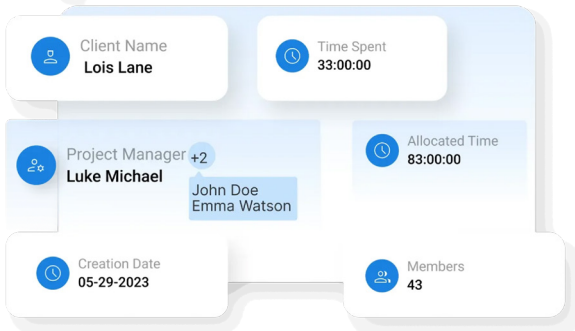

Live dashboards and actionable reporting for faster decisions

Projects, Clients, and Billable Work

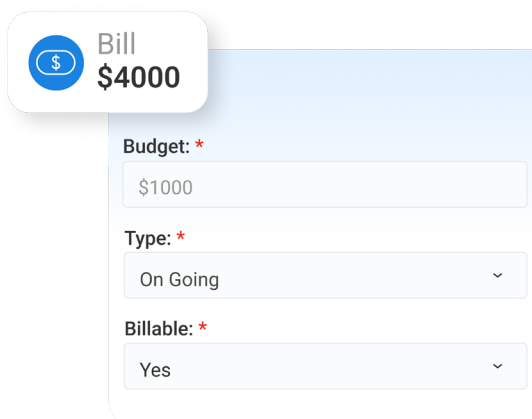

Keep delivery, capacity, and financial visibility connected.

Connected project economics

Project hours, capacity, client work, billing, and internal analysis remain connected.

- Create and organize projects and tasks
- Assign work and manage priorities
- Track project hours and activity history
- Categorize billable and non-billable work
- Manage client relationships and associated work
- Review team capacity and resource allocation
- Generate accurate reports for billing and internal analysis
- Connect time records with payroll and cost-management workflows

This combination is especially valuable for service businesses, agencies, consultancies, technical teams, and organizations that need to understand both workforce performance and the economics of delivery.

Connect client work, billable time, capacity, and delivery outcomes

A Solution for Every Industry

StaffViz adapts to the operating rhythm of different sectors, teams, and locations.

Desk & Knowledge Work

- Startups
- IT and Technology
- Freelancing
- Accounting & Finance
- Law firms
- Architecture & Engineering
- Marketing and Advertising
- Staffing and Recruitment

Field and Distributed Operations

- Construction
- Real Estate
- Logistics
- Agriculture & Farming
- Healthcare Outreach

Cloud + On-Prem

Deployment flexibility

Security, privacy, access control, and enterprise deployment flexibility

Data Integrity by Design

Controls that help keep workforce information accurate, protected, traceable, and available to authorized users.

Controlled Access

- Single Sign-On and role-based permissions
- Restricted access based on user, manager, team, department, and administrative responsibilities
- Least-privilege access to sensitive employee, payroll, activity, and operational information

Protection and Privacy

- Encrypted data handling across approved deployment environments
- StaffViz acts as a data processor
- Company task, employee, and work data is not sold or rented
- Limited third-party access only where required to deliver approved services or meet lawful obligations

Accuracy and Traceability

- Time-stamped records for time, attendance, tasks, approvals, shifts, and payroll workflows
- Approval and locking workflows
- Reports and activity histories that support review, reconciliation, and auditability
- Configurable retention options and controlled data-deletion requests

Incident & Audit Readiness

- Defined incident-response process with initial customer communication within 24 hours of becoming aware of a breach
- Data-processing agreements and documented privacy responsibilities
- Support for independent data-processing audits upon written customer request, subject to agreed procedures

Deployment Choice

Organizations can select a secure cloud environment or a proven on-premise deployment to align data location, network access, infrastructure control, and internal governance with their requirements.

Protected, traceable, and audit-ready workforce data

Proven On-Premise Deployment

Already deployed successfully for organizations that require direct infrastructure and data control.

StaffViz is available as a proven on-premise deployment in addition to its cloud offering. Organizations can operate the platform within their own infrastructure or approved private environment while retaining the connected workforce capabilities of StaffViz.

Why organizations choose on-premise

- Data residency within customer-controlled infrastructure
- Private-network access and organization-defined security policies
- Greater control over application hosting, databases, backups, and recovery processes
- Alignment with internal IT, regulatory, procurement, and governance requirements
- Dedicated deployment environments for enterprise and sensitive operations
- Integration with approved identity, network, and business systems
- Local operation for locations with restricted or controlled internet access

Implementation approach

- | | |
|----------------------------|-------------------------|
| 1 Assessment | 2 Environment setup |
| 3 Migration + integrations | 4 Controlled validation |
| 5 Admin training | 6 Ongoing support |

Cloud or on-premise, the objective remains the same: one reliable view of desk, field, and floor operations.

Enterprise deployment aligned with data, network, and governance requirements

Customer Outcomes and Service

Technology supported by onboarding, assistance, and real-world results.

StaffViz case studies describe measurable improvements for organizations managing distributed work, time reporting, productivity, training, and operational performance.
